"A WORLD OF OPPORTUNITIES
WITHIN OUR REGION"

January 19, 2010

Please note that this document (Schedule “A”) is one of three parts of the Official Community Plan. This Plan also includes the Land Use Designation Map (Schedule “B”) and the Ecological and Wildlife Values Map (Schedule “C”) to which this document refers. Both maps can be viewed at the Regional District office. If you wish to obtain a copy of either map, large format copying charges apply. The maps are also available on the Regional District’s website: www.rdbn.bc.ca.

SECTION 1 – INTRODUCTION

1.1 Purpose

The *Vanderhoof Rural Official Community Plan* is a public bylaw which is adopted by the Board of Directors of the Regional District of Bulkley Nechako and approved by the Minister of Community and Rural Development. The Plan is for Electoral Area “F” (Vanderhoof Rural) which is shown on Map No. 1 below.

The Vanderhoof Rural Official Community Plan endeavours to identify the rural community’s aspirations with respect to land use and development for the next five to ten years. In doing so, the Plan contains goals, objectives and policies which describe the form and character of existing and proposed land uses in the Plan area. By considering and adhering to these statements, development will take place in a manner consistent with the physical, economic, and social vision of the Plan area.

The Plan is not a land use, subdivision, or development regulation. Regulations are set out in the zoning and other bylaws. The Plan contains the community’s vision for the future, and states how the community aims to reach that vision. The Plan is intended to be used to provide direction regarding planning and development within the Vanderhoof rural area by the public, the Board of Directors, Regional District staff, and Provincial agencies.

It is intended that all amendments to Regional District land use and development bylaws be in compliance with the intent and direction provided by the policies in the Plan.

Map No. 1

1.2 Plan Area Profile

Electoral Area F encompasses a large part of the Nechako River Valley and is recognized as among the most favorable areas for farming in the northern interior. The area is also noted for abundant outdoor recreation opportunities such as fishing, hunting, hiking and bird watching. There are a number of lakeside resorts and wilderness retreats as well as rustic campgrounds.

The area contains the municipality of Vanderhoof, and the unincorporated communities at Engen and Cluculz Lake. The area also contains the main community of the Saik'uz First Nation at the Stony Creek Indian Reserve in addition to several other reserves. The Nazko Indian Band, Nadleh Whut'en First Nation and Nak'azdli Band also identify traditional lands within the plan area.

According to the Statistics Canada Census for 2006 the population of Electoral Area F declined by 7.3% from 3,384 to 3,137 persons between the years of 2001 to 2006. It is noted that there is common acceptance by Regional District residents that there was a census undercount throughout the region. It is believed that there has been a slight population increase throughout Electoral Area F in the last three years, and that generally the population has been relatively stable.

The municipality of Vanderhoof is the service, entertainment, and business center of Electoral Area F which was one of the first agricultural settlements in BC. According to the Statistics Canada Census for 2006 the population of Vanderhoof declined by 7.4% from 4,390 to 4,064 persons between the years 2001 to 2006. According to BC Statistics the projected population of Vanderhoof was 3,865 persons in 2008.

Forestry and agricultural industries have remained the foundation of the local economy since the arrival of the first settlers. Both industries have helped open up the surrounding wilderness for outdoor recreation based tourism, which now contributes significantly to the economy. One of the areas' major employers, Canfor's Plateau Sawmill, is one of that largest, most efficient sawmills in the world. There are also several specialty wood products plants and a large pellet plant. The agriculture sector in the Nechako Valley dates to the turn of the century and primarily consists of beef, forage and grain production.

According to the Statistics Canada Census for 2006 the labour force for Electoral Area F consists of 1775 persons. Their employment is broken down by occupation type as follows.

- 5.6% - management
- 9.3% - business, finance, and administration
- 2.0% - natural and applied sciences
- 4.7% - health occupations
- 5.3% - social science, education, government service, religion
- 1.1% - arts, sport, recreation, culture

- 17.2% - sales and service
- 24.2% - trades, transport and equipment operators
- 23.6% - primary industry
- 7.0% - processing, manufacturing, and utilities

The agriculture and resource based industries are responsible for 28.4% of employment in the area, followed by manufacturing industries at 18.5% and other services at 14.0%.

1.3 First Nations Communities

1.3.1 Saik'uz First Nation

The Saik'uz First Nation has 878 band members, and approximately 362 live on reserve. The band administration office, community multiplex, health centre, volunteer fire hall, potlatch house, convenience store, church, school, daycare, adult education center, and sports field are located on the Stoney Creek Reserve No. 1, which is located approximately 14 km south of Vanderhoof on Kenny Dam Rd. The Saik'uz First Nation includes 10 reserves with a total of 3235.7 hectares in and south of Vanderhoof. The Saik'uz First Nation is a member of the Carrier Sekani Tribal Council.

Today the main employer of Saik'uz First Nations people is the Band Administration office. Other economic activities include forest related industry, arts and crafts, a campground, a general store, trapping, seasonal trap manufacturing, seasonal fire fighting, banquet catering, and construction.

1.3.2 Nadleh Whut'en

The Nadleh Whut'en First Nation has 391 band members, and approximately 244 live on reserve. The community band office, school, church, store, community hall, preschool, health centre, and adult learning centre are located on the Nautley Indian Reserve No. 1, which is a short distance west of Fort Fraser just off of Highway 16, outside the plan area. The Nadleh Whut'en includes 7 reserves with a total of 969 hectares between Fort Fraser and Fraser Lake; one unoccupied reserve lies within the plan area. The Nadleh Whut'en Band is a member of the Carrier Sekani Tribal Council.

The forestry products industry (logging and sawmill operations) are the primary sources of employment for the community. In addition a backhoe and excavating business, an auto body business, and a seasonal concession stand at the Provincial park and industrial leases are in operation. Revenues are also generated from the leasing of 48 lakeshore lots. The band also has some land with agricultural potential and hay fields are being developed.

1.3.3 Nak'azdli Band

The Nak'azdli Band is made up of approximately 1500 on and off reserve members. The main community is on the Necoslie Reserve No. 1, which is located in Fort St. James. Nak'azdli has its own Elementary School (known as Nak'albun Elementary), Youth Center, Church, Gas Station, Gymnasium, Band office, Sawmill and are one of three partners in Sustat Holdings Ltd. There are future developments towards a Recreation Center, Community Pool and Shopping Center. The Nak'azdli includes 16 reserves with a total of 1,458 hectares all outside the plan area. The Nak'azdli Band is a member of the Carrier Sekani Tribal Council.

Much of the Nak'azdli activities revolve around forestry, with some trapping, hunting, and fishing. Nak'azdli Band administration delivers programs for finance and administration, social service, health, housing, capital and public works, education, training and development, economic development and recreation.

1.3.4 Nazko Indian Band

The Nazko Indian Band has 338 band members, and approximately 164 live on reserve. The health centre, recreation centre, and about 30 residential houses are located on Nazco 20, which is located approximately 100 km west of Quesnel on the Nazko River at Stump Lake. The band council and administration office for Nazko members is in the City of Quesnel. The Nazko includes 19 reserves with a total of 1851.4 hectares all outside the plan area. The Nazko Indian Band is a member of the Carrier Chilcotin Tribal Council.

1.4 Legislative Authority

The *Vanderhoof Rural Official Community Plan* has been prepared in accordance with the *Local Government Act*.

Lands within the Plan area are also subject to other Provincial and Federal legislation or regulations. This includes, but is not limited to, the *Forest and Range Practices Act*, *Health Act*, *Land Act*, *Mines Act*, *Environmental Management Act*, and the *Agricultural Land Commission Act*. Certain aspects of the Plan are required to be in accordance with Provincial legislation and interests.

1.5 Plan Review and Amendments

New information and changing circumstances must be continually monitored in order to ensure that the application of the Plan continues to be current. A comprehensive review of the Plan shall be undertaken every five to ten years depending on the actual conditions which occur to influence land use.

Revisions to the Plan must be made in accordance with the *Local Government Act* and are subject to a formal approval process. Individuals or groups requesting revisions to the Plan must submit an application, with supporting material, to the Board of Directors for consideration. The Board may choose to refuse to approve an application and deal with the broad land use issue as part of the next planned comprehensive review.

1.6 The Planning Process

In March 2009 the Regional District of Bulkley-Nechako Board of Directors directed staff to proceed with the review process for the Vanderhoof Rural Plan and approved a consultation strategy.

The review process began with preliminary consultation with the Advisory Planning Commission for the Electoral Area. This Commission is made up of community members appointed by the Electoral Area Director. Referrals were also sent to local First Nations, community groups, the District of Vanderhoof, the School Board, and various Provincial Ministries.

A public information meeting was held in May of 2009 to introduce the review process to the public and to solicit participation on a working group to assist in the review process and the drafting of a new Plan. At the public information meeting the Regional District also undertook a survey to obtain public input regarding the issues that require attention in the plan.

The Ministry of Transportation and Infrastructure, Northern Health Authority, Ministry of Environment, Ministry of Agriculture and Lands, Ministry of Forests and Range, Ministry of Energy, Mines and Petroleum Resources, the Integrated Land Management Bureau, Department of Fisheries and Oceans, District of Vanderhoof, Cluculz Lake Livestock Association, Dairyman's Association, Nechako Valley Regional Cattlemen's Association, Sinkut Mountain Cattlemen's Association, Community Futures - Stuart Nechako, Nechako Valley Historical Society, MBS Community Centre (Mapes, Blackwater, Sob Lake), Braeside Community Recreation Association, Cluculz Lake Community Association, Sinkut Lake Community Group, Nechako Valley Sporting Association, and Saik'uz First Nation were asked to provide a representative to participate on the working group.

Staff created a preliminary draft of the OCP to provide the working group with a format for discussion of issues. The working group was established and a series of working group meetings were held in 2009 on June 2, June 15, June 29, July 14, July 28 and August 18. The focus was on reviewing the process and the mandate of an OCP, identifying and discussing key issues, establishing community visions and goals for the plan area, and reviewing the policies contained in the plan.

The draft was then reviewed by the Electoral Area F Advisory Planning Commission. It was then taken to the public at a second and third open house held on September 24, 2009 in Cluculz Lake and September 29, 2009 in Vanderhoof, for review and input.

Based on this input the draft plan was further refined to reflect the goals and values of the community.

The Draft document was then referred to local First Nations, community groups, the District of Vanderhoof, the School Board, and various Provincial Ministries.

“Vanderhoof Rural Official Community Plan Bylaw No. 1517, 2009” was then forwarded to the Regional District Board with a recommendation for consideration of 1st and 2nd readings prior to being distributed to local First Nations, community groups, the District of Vanderhoof, the School Board and various Provincial Ministries for official review. This process was followed by a Public Hearing, 3rd reading of the bylaw, approval by the Bylaw by the Minister of Community Development, and adoption.

SECTION 2 – PLAN VISION AND GOALS

2.1 General Plan Vision

Electoral Area F envisions its future as a safe, friendly, socially and economically vibrant, and ecologically healthy area. The residents of Electoral Area F understand that development and growth must occur in a manner that is not detrimental to the future viability of agriculture, the area's diverse natural habitat, the world class recreational opportunities local residents and visitors, and the rural character of the communities. Residents have enjoyed a good quality of life that is based upon enjoyment and stewardship of the natural environment, support of and respect for neighbours, an affordable cost of living, a quiet and independent lifestyle, and a relatively stable regional economy. The vision includes communities that strive to protect, and build upon, the above positive aspects that contribute to quality of life and a healthy environment.

Maintaining the viability and of the areas agricultural sector by encouraging and promoting agriculture, resisting the intrusion of residential development into agricultural areas, and discouraging the loss of land from active agricultural use, is recognized as being critically important.

Maintaining the character of existing rural neighbourhoods is also considered very important. This character includes a certain amount of independence and diversity of use and development. The vision is for communities that protect their positive aspects and characteristics, yet are not wary of embracing and working towards positive change for the benefit of the community.

The value of the area's lakes and rivers are critical components of resident's quality of life and the local economy. Therefore, the benefits as well as the responsibilities of waterfront living are recognized. This recognition results in the vision of communities that protect the natural ecology of the area and promote responsible public access to, and enjoyment of, the area's lakes and rivers.

A more diversified economy is becoming increasingly important in order to ensure that the area remains vibrant and residents enjoy economic and employment stability. The communities realize that being able to offer newcomers to the area a high quality of life and an attractive and well functioning built environment will serve to increase the potential for economic diversification beyond reliance on the agricultural and forest products industries.

The Regional District of Bulkley-Nechako is committed to working with local communities in fulfilling its role to address climate change and to reducing greenhouse gas emissions generated in the region. The plan achieves this by striving for land use patterns that create more complete and energy efficient rural neighbourhoods and communities.

2.2 General Plan Goals

The area encompassed by the Vanderhoof Rural Official Community Plan includes a number of characteristics that are recognized by the community as being important to the long-term vitality of the Region. The Plan area's natural beauty, social environment, and economic opportunities attract a diversity of people, business and industry, and these attributes need to be protected and enhanced. The Plan strives to meet the needs of the present without compromising the area's natural, social and economic attributes and without compromising the ability of future generations to meet their own needs. In this effort the Vanderhoof Rural Official Community Plan pursues the following goals.

- 2.2.1** Land use patterns and economic activities which do not compromise the rural character of the Plan area.
- 2.2.2** Land use patterns that maintain the rural character of the Plan area and that reflect a diversity of lifestyles, and economic and recreational activities.
- 2.2.3** Protection and preservation of farm land and soil having agricultural capability, and the appropriate utilization of that land for agricultural purposes.
- 2.2.4** Protection and stewardship of environmentally sensitive attributes (including fish, riparian and wildlife habitat; and quality and quantity of ground and surface water).
- 2.2.5** Recognition of the unique natural characteristics of the Plan area and their protection from incompatible forms of development.
- 2.2.6** Maintenance of a balance between the regulation of land use to protect community values and the desire of local residents for a lifestyle with a high degree of self expression respecting use of their property.
- 2.2.7** Appropriate and orderly rural growth with urban type development directed to the municipality of Vanderhoof.
- 2.2.8** Provision of opportunities for economic development and diversity.
- 2.2.9** Directing large scale commercial development to the municipality of Vanderhoof.
- 2.2.10** Land use patterns and development forms that reduce sprawl.
- 2.2.11** An appropriate mix of uses that increases the community's independence and results in a reduction in car dependency and energy use.

2.3 Cluculz Lake

The Cluculz Lake area is dominated by residential and recreational lot development. The area is characterized by a strong sense of community, an appreciation for the quality of life / recreational experience provided by the lake and the natural landscape.

The community contains a fire hall, a community hall, a resort with a convenience store and restaurant, and approximately 1800 persons living in 692 homes. The population of Cluculz Lake peaks during the summer months due to the number of seasonal homes in the area.

The community opinion regarding new development to serve the local area appears to be mixed. A segment of the community believe that adequate retail and other commercial services exist and they do not support new commercial activity to serve local residents. Another segment of the community support the establishment of increased local commercial services.

2.3.1 Cluculz Lake Goals

Cluculz Lake has the following goals that are in addition to the general plan goals.

- (1) To provide opportunities for local shopping and services within the community.
- (2) To improve public access to the Cluculz Lake lakeshore, including waterfront public parks and a public boat launch.
- (3) To grow and develop in a manner that is responsible to the area's unique and valued natural attributes.
- (4) To address, in a cooperative manner, the negative environmental impacts associated with older septic systems serving small waterfront residential and recreational lots.
- (5) To support the addition of a limited amount of new small scale commercial activity where that activity is appropriately located and clearly designed to exclusively serve the local community.

SECTION 3 – OBJECTIVES AND POLICIES

The Regional District of Bulkley Nechako is committed to achievement of the goals in this Plan through application of the policies in this Section.

3.1 Agriculture (AG) Designation

The Agriculture (AG) designation applies to those areas that are most suitable to agricultural activities. It is the intent of this designation to preserve these lands for the purposes of farming and other related activities. In general the Agriculture (AG) designation follows the boundaries of the Agricultural Land Reserve (ALR).

3.1.1 Objectives

- (1) To protect and preserve farm land and soil having agricultural capability.
- (2) To encourage the expansion and full utilization of land for agricultural purposes.
- (3) To support the objectives of the Provincial Agricultural Land Commission.
- (4) To encourage a diversity of agricultural uses and opportunities.

3.1.2 Policies

- (1) Agriculture, grazing, and other compatible uses of land provided within the *Agricultural Land Commission Act* will be permitted.
- (2) Silviculture practices and aggregate extraction that allow the restoration of land for agriculture are supported within the Agricultural (AG) designation.
- (3) A minimum parcel size of 16 hectares (39.5 acres) is supported unless a different parcel size is approved by the Agricultural Land Commission.
- (4) New roads and utility and communication corridors required in the Plan area should minimize the negative impact on existing and potential agricultural operations.
- (5) Wherever possible contiguous areas of agricultural land will be preserved to ensure that agriculture and associated activities remain economically viable and environmentally sound.
- (6) Severances for small lot residential (other than home site severances approved by the Agricultural Land Commission), institutional, commercial or industrial development shall be avoided. However, applications for exclusions, subdivisions, and non-farm uses within the Agricultural Land Reserve may be supported if:

- (a) There is limited agricultural potential within the proposed area;
 - (b) Soil conditions are not suitable for agriculture;
 - (c) Neighbouring uses will not be compromised;
 - (d) Adequate provisions for fencing are provided, where necessary;
 - (e) There is a demonstrated need for the proposed development; and,
 - (f) The application is in the best interest of the community.
- (7) The inclusion of land in the Agricultural Land Reserve (ALR) is supported provided the reason for inclusion is based solely on the arability of that land.
- (8) The voluntary consolidation of legal parcels which form part of the same farm unit will be encouraged. Subdivisions and consolidations which permit more efficient use of land for agricultural purposes will also be supported.
- (9) The Regional District supports the implementation and enforcement of the *Farm Practices Protection Act*, the *Code of Agricultural Practice for Waste Management* and applicable environmental guidelines for agricultural producers.
- (10) Home based businesses, including bed and breakfasts, operated in accordance with the requirements of the Agricultural Land Reserve are supported.
- (11) The Province is encouraged to implement innovative approaches to making appropriately located Crown lands available and affordable for agricultural use.
- (12) The Regional District encourages the Agricultural Land Commission to take steps to prohibit the use of productive agricultural land for the planting of trees for purposes of creating a carbon sink or carbon offset.
- (13) The planting of trees on non-arable land within the Agricultural Designation is encouraged.
- (14) The Province is encouraged to support local agricultural operations to ensure their long term viability.
- (15) The conversion of small parcels created to accommodate institutional uses such as churches and community halls to residential development shall be discouraged.

3.2 Commercial (C) Designation

Only a limited amount of commercial development has been designated within the Plan area in an attempt to focus commercial activity within the District of Vanderhoof.

Opportunities for neighbourhood based services, tourist commercial services and bed and breakfasts may be permitted within the rural areas surrounding these communities subject to the following Commercial objectives and policies.

3.2.1 Objectives

- (1) To provide for limited and appropriate opportunities for tourist and neighbourhood commercial development throughout the Plan area, where those services are necessary and do not conflict with existing uses.
- (2) To support and provide opportunities for home based and cottage industries.
- (3) To recognize the District of Vanderhoof as the commercial centre of the Plan area.

3.2.2 Policies

- (1) Significant commercial uses will be encouraged to establish within the District of Vanderhoof.
- (2) Commercial areas for neighbourhood services may be designated subject to the following criteria.
 - (a) The primary target market for the service(s) to be provided or sold is the local rural area, and that area is not already adequately serviced.
 - (b) Sufficient on-site parking is provided.
 - (c) The proposed commercial use will not create an amount of traffic, noise or other impact that will adversely affect the rural character of the area.
 - (d) Traffic management issues will be considered and addressed appropriately.
 - (e) The proposed commercial development will minimize negative impacts on the natural environment.
 - (f) The proposed commercial use will minimize negative impacts on neighbouring land uses or property owners.

- (g) The proposed commercial use has the support of the Agricultural Land Commission if the land is within the Agricultural Land Reserve (ALR).
- (3) Tourist Commercial uses may be designated subject to the following criteria.
- (a) The use is directly associated with a distinctive or special characteristic or feature of the Plan area.
 - (b) The proposed commercial use will not create an amount of traffic, noise or other impact that will adversely affect the rural character of the area.
 - (c) Traffic management issues will be considered and addressed appropriately.
 - (d) The proposed commercial development will not have a negative impact on the natural environment.
 - (e) Negative impacts on neighbouring land uses or property owners are minimized.
 - (f) The proposed commercial use has the support of the Agricultural Land Commission if the land is within the Agricultural Land Reserve (ALR).
- (4) Limited highway commercial developments may be considered in the Engen town site, in close consultation with the Agricultural Land Commission.
- (5) Home based businesses are supported subject to restrictions on size, outdoor storage, employees and signs.
- (6) Bed and breakfasts are encouraged throughout the Plan area subject to the following criteria:
- (a) Any bed and breakfast rooms shall be located within the principal dwelling unit on a parcel; and,
 - (b) the number of rooms available for guest use shall vary depending upon the characteristics of the parcel but in no case shall exceed five (5) bedrooms.
- (7) A mix of uses compatible with a community commercial centre may be permitted without amendment to the Official Community Plan. Compatible uses may include convenience stores, offices, restaurants, personal service uses, recreation facilities, retail stores, produce markets,

neighbourhood pubs, public assembly, personal care, and schools where those uses are intended to satisfy the commercial, recreational, institutional and public use needs of residents and tourists in the Cluculz Lake area.

3.3 Industrial (I) Designation

Industrial development has been limited within the rural areas in an attempt to focus industrial activity in the municipality of Vanderhoof. Light industrial developments are permitted within the rural area within the Industrial (I) designation. Other areas may be considered for Industrial use subject to the following Industrial polices.

3.3.1 Objectives

- (1) To provide opportunities for limited light industrial uses in suitable locations.
- (2) To accommodate primary resource extraction and primary processing, as well as value added industry.
- (3) To support industrial uses that will not have any significant negative impact on the natural environment.

3.3.2 Policies

- (1) New light industrial uses will be encouraged to establish within the boundaries of the District of Vanderhoof and existing concentrations of population such as, but not limited to, Engen and Cluculz Lake.
- (2) The Regional District Board may consider designating additional areas for industrial uses subject to the following criteria:
 - (a) all existing industrial land is developed or it is demonstrated that the designated industrial areas are unsuitable for the proposed use;
 - (b) the proposed industrial development will not create an amount of traffic, noise, or other impact that will adversely affect the rural character of the area;
 - (c) the proposed industrial development will be developed in a manner that has minimal negative impacts on the environment;
 - (d) negative impacts on neighbouring land uses or property owners will be minimized; and,

- (e) the proposed industrial use has the support of the Agricultural Land Commission if the land is within the Agricultural Land Reserve (ALR).
 - (f) the proposed industrial development is in close proximity to an available workforce.
- (4) To support agricultural industry in appropriate locations throughout the Plan area.

3.4 Rural Residential (RR) Designation

The Rural Residential (RR) designation is intended to provide opportunities for people to live in a rural setting while protecting and preserving the rural character of the area. Development requiring a higher level of community services, such as water and sewer, will be directed into the District of Vanderhoof. The majority of rural residential development is anticipated to occur in the Cluculz Lake area.

3.4.1 Objectives

- (1) To provide opportunities for residential lots that fit the existing rural character of the Plan area.
- (2) To support opportunities for affordable housing, rental housing and special needs housing.
- (3) To ensure future development does not have a significant negative impact on the natural environment.
- (4) To protect and enhance the quality of life associated with existing and new rural residential development.
- (5) To take advantage of opportunities for new housing forms that fit the character of rural areas to allow rural residents greater opportunity to age in place.

3.4.2 Policies

- (1) Low to moderate density residential (fee simple and bare land strata) subdivisions, recreational and other unobtrusive uses will be permitted in the Rural Residential designation. Limited forms of agriculture may be permitted within the implementing zoning bylaw.
- (2) Home based business and cottage industries are supported subject to restrictions which will ensure that they will not have an adverse impact on neighbouring uses and the rural character of the area.

- (3) The Regional District will not take responsibility for the operation, maintenance or funding of any new water or sewer system associated with Rural Residential development.
- (4) Rezoning applications to allow a strata subdivision that relies on privately operated sewer or water systems may be considered by the Board of Directors if it can be demonstrated that the system can be adequately designed and maintained, with an appropriate capital reserve for replacements in place.
- (5) Rezoning applications to allow a freehold subdivision that relies on privately operated sewer or water systems shall not be supported.
- (6) Rezoning applications to allow a strata subdivision with parcels smaller than 2 hectares (4.94 acres) may be considered where appropriate, provided that:
 - (a) the subdivision includes less than 9 strata parcels;
 - (b) the size of the parent parcel is a minimum of 2 hectares (4.94 acres) of Rural Residential designated land for each strata parcel proposed (for example a proposal for 5 strata parcels would require a parent parcel of 10 hectares (24.7 acres));
 - (c) a covenant restricting further subdivision must be registered on the remainder of the parent parcel; and
 - (d) the applicant submits an acceptable fire prevention plan for the development and secures the major aspects of the plan by covenant, unless the land is in a Rural Fire Protection Service Area.
- (7) Rezoning applications to permit 5 or more parcels smaller than 2.0 hectares (4.94 acres), where groundwater is to be the source of supply, shall not be supported unless the application is accompanied by a report prepared by a qualified Professional Engineer discussing:
 - (a) water quality and quantity, and the possibility of influence or contamination by groundwater or other sources; and
 - (b) the recommended siting of any on site septic system in relation to the groundwater wells.
- (8) Only one dwelling per parcel shall be permitted on parcels that are smaller than 4 ha (9.88 acres). Not more than two dwellings shall be permitted on parcels that are larger than 4 ha (9.88 acres).
- (9) Rezoning applications to permit parcels as small as 2 hectares (4.94 acres) may be considered where:

- (a) it has been demonstrated that the proposed lots can accommodate an on-site water supply and sewage disposal system;
 - (b) the development is compatible with adjacent land uses and maintains the rural character of the area;
 - (c) parcels are not located within a floodplain or on other hazard lands; and,
 - (d) the development adequately addresses wildlife and ecological values.
- (10) Rezoning applications to permit parcels smaller than 2 hectares (4.94 acres) to a minimum parcel size of 0.4 hectares (1 acre) may be considered where:
- (a) an existing parcel is truncated by an existing road or natural water feature; and,
 - (b) the criteria outlined in Section 3.4.2 (9) are addressed.
- (11) Rezoning applications to permit parcels smaller than 2 hectares (4.94 acres) to a minimum parcel size of 0.8 hectares (2 acres) may be considered where:
- (a) the reduced parcel size for certain parcels will result in a parcel layout that provides improved protection of an environmentally unique or sensitive area; and
 - (b) the average size of all parcels created is not smaller than 2 hectares (4.94 acres).
- (12) The development of new Manufactured Home Parks is discouraged throughout the Plan area, and is directed to locate within the District of Vanderhoof.

3.5 Lakeshore (L) Designation

The Lakeshore (L) Designation is intended to accommodate the demand for residential development in close proximity to Cluculz Lake, Nulki Lake, and any other lake in the Plan area. Residents value the peacefulness and the natural setting that exists near areas designated Lakeshore. Not all lands adjacent to the lakes are designated for Lakeshore development. The lands available are limited to allow in-fill development at a scale that will not impact the character of existing Lakeshore development or other neighbourhoods. The density and scale of development is also limited to ensure that the environmental integrity of the lakes are not negatively impacted, and to avoid the

necessity for the establishment of development permit areas to further control lakeshore development.

3.5.1 Objectives

- (1) To provide opportunities for lakeshore residential lots that fit the existing character of the Plan area.
- (2) To ensure future development does not have a negative impact on the natural environment.
- (3) To protect and enhance the quality of life associated with existing and new Lakeshore and rural residential development.

3.5.2 Policies

- (1) Low to moderate density residential (fee simple and bare land strata) subdivisions, recreational and other unobtrusive uses will be permitted in the Lakeshore designation.
- (2) Home based business and cottage industries are supported subject to restrictions which will ensure that they will not have an adverse impact on neighbouring uses or the character of the area. Home based businesses on parcels with a contiguous area of less than 0.2 hectares (0.49 acres) shall be limited to office-type businesses and shall be fully contained within the primary dwelling unit.
- (3) The Regional District will not take responsibility for the operation, maintenance or funding of any new water or sewer system associated with Lakeshore development.
- (4) Rezoning applications to allow a strata subdivision that relies on privately operated sewer or water systems may be considered by the Board of Directors if it can be demonstrated that the system can be adequately designed and maintained, with an appropriate capital reserve for replacements in place.
- (5) Rezoning applications to allow a freehold subdivision that relies on privately operated sewer or water systems shall not be supported.
- (6) Rezoning applications to allow a strata subdivision with parcels smaller than 2 hectares (4.94 acres) may be considered where appropriate, provided that:
 - (a) the size of the parent parcel is a minimum of 1.2 hectares (2.96 acres) of Lakeshore designated land for each strata parcel proposed (for example a proposal for 5 strata parcels would require a parent parcel of 6 hectares (14.8 acres));

- (b) a covenant restricting further subdivision must be registered on the remainder of the parent parcel; and
 - (c) the applicant submits an acceptable fire prevention plan for the development and secures the major aspects of the plan by covenant, unless the land is in a Rural Fire Protection Service Area.
 - (d) The scale of the proposed development fits within the character of the area, and will not have a notable negatively impact on the area.
- (7) Only one dwelling per parcel shall be permitted.
- (8) Rezoning applications to permit parcels as small as 2 hectares (4.94 acres) may be considered where:
- (a) it has been demonstrated that the proposed lots can accommodate an on-site water supply and sewage disposal system;
 - (b) the development is compatible with adjacent land uses and maintains the rural character of the area;
 - (c) parcels are not located within a floodplain or on other hazard lands; and,
 - (d) the development addresses wildlife and ecological values.
- (9) Rezoning applications to permit parcels smaller than 2 hectares (4.94 acres) to a minimum parcel size of 0.4 hectares (1 acre) may be considered where:
- (a) an existing parcel is truncated by an existing road or natural water feature; and,
 - (b) the criteria outlined in Section 3.6.2 (8) are addressed.
- (10) Rezoning applications to permit parcels smaller than 2 hectares (4.94 acres) to a minimum parcel size of 0.8 hectares (2 acres) may be considered where:
- (a) the reduced parcel size for certain parcels will result in a parcel layout that provides improved protection of an environmentally unique or sensitive area; and
 - (b) the average size of all parcels created is not smaller than 2 hectares (4.94 acres).
- (11) Rezoning applications to permit new waterfront parcels shall not be supported if a lot is serviced by a septic field that is within 100 metres from any lake, unless that septic field is designed by an appropriately qualified

engineer or geoscientist to confirm that the proposed septic field will not have any long term detrimental impacts on the adjacent water body. In no case should the setback be less than 30 metres.

- (12) The Provincial Subdivision Approving Officer is encouraged to consider options to amalgamate required water access points to create the opportunity for the potential use and development of those lands for public access and recreational purposes. The numerous access points spread out along the waterfront as part of a typical subdivision are not practical for use or development. It is noted that the Province does not create these access points with the intent to develop them for any public use.
- (13) Rezoning applications to permit new waterfront subdivisions that would typically contain a number of waterfront access points shall consider amalgamating the required water access points onto a single area which is practical for development and use as public access.

3.6 Civic Institutional (CI) Designation

The Civic Institutional designation is intended to provide a range of public, government, and community related uses within the Plan area. Such uses may include schools, fire halls, community halls and churches.

3.6.1 Objective

- (1) To provide for the establishment of public facilities when necessary. It is noted that rural fire halls are acceptable in any designation.

3.6.2 Policies

- (1) The Regional District will cooperate with the local school district in planning for educational facilities. This will include:
 - (a) assessing the demand for new facilities by considering residential development activities and proposals; and,
 - (b) selecting appropriate sites for schools.
- (2) The Regional Board will permit additional Civic Institutional uses by way of rezoning, without the requirement for an OCP amendment subject to the following criteria:
 - (a) there is a demonstrated need for the proposed service;
 - (b) the proposed civic institutional use will not create an amount of traffic that will adversely affect the rural character of the area;

- (c) the proposed civic institutional development will minimize negative impacts on the environment;
- (d) the proposed civic institutional use will minimize negative impacts on neighbouring land uses or property owners; and,
- (e) the proposed civic institutional use has the support of the Agricultural Land Commission if the land is within the Agricultural Land Reserve (ALR).

3.7 Parks and Recreation (P) Designation

The economic and social benefits of outdoor recreation and public access to natural amenities are recognized. Lands throughout the Plan area have been designated in an effort to protect areas having significant recreational or environmental attributes. While parks and recreation uses are permitted throughout the Plan area this designation may be used in the future to designate additional areas for parks and recreation purposes.

3.7.1 Objectives

- (1) To protect lands having significant recreational and/or environmental value.
- (2) To improve outdoor recreational opportunities that enhance the liveability and tourism potential of the area.
- (3) To support and encourage the appropriate use of recreational amenities within the Regional District in order to enhance the economy of the area.
- (4) To protect or secure public access to natural amenities and important landscape features.
- (5) To support appropriate outdoor public recreation opportunities on provincial lands, in a manner that does not unnecessarily conflict with or restrict the resource capacity of those lands.

3.7.2 Policies

- (1) Provincial parks are recognized as important attributes of the Plan area and are designated as Parks and Recreation (P) on the Land Use Designation Map (Schedule "B").
- (2) Additional park and recreational uses will be permitted throughout the Plan area where appropriate.
- (3) Parcels used for parks and recreation purposes will not be subject to a minimum parcel size.

- (4) The Regional Board supports the preservation of existing, and identification of new public recreation sites and access points along area lakes and rivers.

3.8 Resource (RE) Designation

The Resource area is characterized by a lack of settlement and by extensive resource management potential. It is the intent of this designation to protect the resource values of the designated area and to minimize resource conflicts among recreation, grazing, mining and wildlife by discouraging settlement on Resource designated lands. These lands are also valued for their environmental attributes and as wildlife habitats.

3.8.1 Objectives

- (1) To preserve lands within the Plan area for agriculture and grazing, mineral or aggregate extraction, fish and wildlife management, trapping, wilderness oriented recreation and necessary institutional, public, utility or transportation services.
- (2) To support sound sustainable resource management within the Resource (RE) designation.

3.8.2 Policies

- (1) Only uses directly associated with agriculture and grazing, mineral or aggregate extraction, fish and wildlife management, wilderness oriented recreation, and necessary institutional, public, utility or transportation services use will be permitted in the Resource (RE) designation. A very limited amount of low density residential use may be permitted within this designation, where appropriate.
- (2) The minimum parcel size within the Resource (RE) designation shall be 8 hectares (19.77 acres).
- (3) Wherever possible established routes used by cattle or wildlife; recreation lands; and rare or unique fish and wildlife habitats will be protected from incompatible land uses.
- (4) Access to timber and recreation lands will be preserved wherever possible.
- (5) Rezoning applications to allow wind turbines intended to generate power for sale shall be considered on Resource designated lands where it can be demonstrated that the turbines will not have an unacceptable negative impact on a residential area, and will not an unacceptable environmental impact.

SECTION 4 – GENERAL APPLICATION OBJECTIVES AND POLICIES

4.1 Mineral and Aggregate Resources

A number of provincial and federal acts pertaining to resource extraction activities supersede the Regional District's land use authority on crown and private land. These acts include, but are not limited to the *Mines Act*, the *Mineral Tenure Act*, and the *Forest and Range Practices Act*. While the agencies responsible for managing this legislation have review processes that address the public interest in these matters the final decisions regarding land use rest with the Province. The *Local Government Act* only permits a Regional District to express broad objectives with respect to mineral and aggregate resources within an Official Community Plan.

4.1.1 Objectives

- (1) To support the conservative use of mineral and aggregate resource deposits and to protect these from development that would irreversibly prohibit its future utilization.
- (2) To provide opportunities for the exploration and development of metallic, industrial mineral and sand and gravel resources.
- (3) To encourage the Province to require the appropriate rehabilitation of gravel pits.

4.1.2 Policies

- (1) The Provincial government is recognized as being responsible for the administration of the Province's mineral and aggregate resources under various pieces of legislation.
- (2) All sand and gravel deposits are recognized by the Regional District Board as being within the provincial management jurisdiction. These deposits are too numerous to show on the map in Schedule "B".
- (3) Soil removal and deposit within the Agricultural Land Reserve (ALR) is recognized as being subject to the *Agricultural Land Commission Act*.
- (4) The Regional District encourages the Ministry of Energy, Mines and Petroleum Resources to give due consideration to the impact of extraction and processing activities on surrounding land uses and developments.
- (5) The Regional District encourages the Ministry of Energy, Mines and Petroleum Resources not to issue new surface permits for sand and gravel/quarry processing near residential areas unless the applicant

demonstrates how mitigation measures will minimize or nullify the effects of the proposed activity.

- (6) The Regional District encourages the Ministry of Energy, Mines and Petroleum Resources to require appropriate reclamation of gravel pits and mine sites and to ensure that adequate bonding is secured, and that the reclamation is undertaken in a timely manner.

4.2 Natural Environment

The natural environment is the foundation of the economic, ecological, and social viability of the Plan area. As such, careful management at local, regional and provincial levels is necessary. The Regional District recognizes the provincial government as having the primary responsibility in managing this resource and supports provincial efforts to manage the natural environment appropriately.

Cluculz Lake, Tachick Lake, Nulki Lake, Sinkut Lake, and the Nechako River and their watersheds are the predominant natural features of the area. Their importance, along with other lakes and watercourses to the local communities, the entire region, and areas beyond cannot be over emphasized. These features play a role in many aspects of community life. They are the source of drinking water, an economic generator, and a recreational playground. Not only are the area's lakes and rivers an important amenity for the community and visitors, they are also the natural habitat for a wide variety of fish and aquatic life, waterfowl, and plant species.

The importance of these lakes and rivers and their watersheds must also be looked at from a regional perspective. The water drains into the Nechako River and makes up part of the Fraser Drainage Basin, which flows into the Pacific Ocean. Communities within the Fraser Drainage Basin also rely on the health of this surface water.

4.2.1 Objectives

- (1) To protect environmentally unique, rare, or sensitive areas or features; including, but not limited to, wildlife corridors, limited wildlife habitats, seasonal and year-round watercourses, lakes, ponds, wetlands, and riparian habitats.
- (2) To establish a high priority to protect air quality, and surface and ground water resources on a watershed level for the benefit of the environment and human health and safety.
- (3) To establish a high priority to protect the water quality of Cluculz Lake, Tachick Lake, Nulki Lake, and Sinkut Lake.
- (4) To enhance environmental awareness and promote activities that protects and restores the natural environment.

4.2.2 Policies

- (1) The Regional District encourages the protection and enhancement of fish and wildlife habitats throughout the Plan area through the following means:
 - (a) alternative development practices such as lot averaging, where appropriate;
 - (b) conservation covenants; and,
 - (c) The dedication of lands to a private land trust, non government organization, or the Province.
- (2) The “Ecological and Wildlife Values” map (Schedule “C”), shows a number of important wildlife and ecological areas. The Regional District supports and encourages development proponents to incorporate protection and enhancement of these areas and associated values in the design of development within the Plan area.
- (3) The Regional District supports efforts by the Provincial government to identify wildlife and ecological values, with the input of residents, through various planning processes.
- (4) The Regional District will support and encourage the retention of a greenbelt of natural vegetation along watercourses.
- (5) Provincial and federal governments and non-governmental organizations will be supported in their efforts to enhance the fish and wildlife resources in the Plan area.
- (6) The Regional District recognizes the importance of healthy air quality, and surface and ground water resources on a local, regional and provincial scale and supports efforts to protect the quantity and quality of these resources for future generations.
- (7) The Regional District encourages environmentally sound farm practices which protect surface and ground water and soil quality.
- (8) The Regional District encourages the Provincial government to undertake an inventory and study of groundwater sources to determine the best means of protecting these water supplies.
- (9) Efforts to work with the community, landowners and developers to protect environmentally unique or sensitive areas through the provision of information and education are supported.

- (10) Rezoning applications to allow subdivision or development on land adjacent to or containing environmentally unique, rare, or sensitive areas shall only be supported if it can be reasonably demonstrated that the proposed development will not negatively or adversely impact surface or groundwater resources or an environmentally unique or sensitive area.
- (11) The Regional District supports and encourages the dissemination of educational information about the importance of responsible stewardship of the environment.
- (12) The Regional District encourages the replacement of older, on-site sewage systems with newer systems using improved technology to prevent potential contamination of the shoreline and water.
- (13) The Regional District discourages the removal of vegetation along the shoreline, as this can lead to erosion, loss of food and nutrients for fish, and loss of shade for young fish. Landowners are encouraged to refer to the Ministry of Environment's Best Management Practices for Hazard Tree and Non Hazard Tree Limbing, Topping, or Removal.
- (14) The Integrated Land Management Bureau, in carrying out reviews of foreshore tenure applications, is encouraged to take the following factors into consideration, with emphasis on the environmental sensitivity of the foreshore areas, as well as ensuring an appropriate relationship with upland areas.
 - (a) Private moorage should not impede pedestrian access along the beach portion of the foreshore.
 - (b) The siting of new private moorage shall be undertaken in a manner that is consistent with the orientation of neighbouring private moorage, is sensitive to views and other impacts on neighbours, and avoids impacts on access to existing private moorage and adjacent properties.
 - (c) Non-moorage uses are not appropriate on foreshore areas. These include facilities such as beach houses, storage sheds, patios, sun decks, and hot tubs. These types of development should occur only on privately owned upland.
 - (d) Private moorage owners and builders are encouraged to refer to the Ministry of Environment's Best Management Practices for Small Boat Moorage on Lakes, and the Department of Fisheries and Oceans' Pacific Region Operational Statement for Dock Construction, when constructing a dock.

- (15) Government agencies that have mandates for protecting the environmental integrity of the area's lakes, especially Cluculz Lake, Tachick Lake, Nulki Lake and Sinkut Lake, are encouraged to carry out scientific research and water quality testing to monitor the quality of lake water, identify the causes of the reduced water quality, and take steps toward correcting the situation.
- (16) The protection of the environmentally unique or sensitive areas through the purchase or dedication of lands to a private land trust, non government organization, or the Province is encouraged.
- (17) The Subdivision Approving Officer is encouraged to follow Provincial guidelines for development near aquatic areas and other environmentally sensitive areas.
- (18) The Province is encouraged to prohibit the dumping of sewage and other waste from boats into Cluculz Lake, Tachick Lake, Nulki Lake, and Sinkut Lake and the Nechako River.

4.3 Heritage Resources

Heritage resources are recognized by the Regional District as being an integral part of the attributes of the Plan area. As such, the Regional District encourages the identification, protection, and conservation of archaeological, historical and paleontological sites throughout the Plan area.

4.3.1 Objectives

- (1) To encourage and facilitate the identification, protection, and conservation of archaeological, historical, and paleontological sites.
- (2) To implement the applicable Provincial legislation regarding archaeological, historical, and paleontological sites as required.

4.3.2 Policies

- (1) In accordance with Provincial legislation development proponents are required to consider archaeological, historical, and paleontological resources during all phases of project planning, design, and implementation.
- (2) The Regional Board recognizes and supports the application and enforcement of the *Heritage Conservation Act* by the Provincial government. Specifically, Sections 12 and 14 of the Act requiring that archaeological sites not be altered or changed in any manner without a permit, is supported by the Regional District.

4.4 Public Services & Utilities

The Plan area is characterized by a dispersed settlement pattern and a level of services and utilities that is common for rural communities. Additional services that are to be supported by the local tax base need to reflect the intent of the Plan to not provide for significant population growth, higher densities or a change to the rural character of the area.

4.4.1 Objectives

- (1) To support the planning and development of public services and utilities which are economically feasible and that have an appropriate degree of public support.

4.4.2 Policies

- (1) Urban scale development requiring community water and sewer services will be directed into municipalities where such services can be provided as an extension to existing systems.
- (2) The Regional District will continue to assist rural residents in assessing the feasibility of new utilities and services in accordance with the *Local Government Act*.
- (3) The location of utility services and communication corridors which minimize the disruption of the natural environment and the impact on existing and potential resource activities or land uses (such as forestry, agriculture, mineral and aggregate extraction, recreation, fish and wildlife management) will be supported.
- (4) The Regional District will encourage the efficient and economic extension of services where there is a demonstrated need and public support.

4.5 Transportation

Cost efficient and safe transportation networks that are well developed and maintained are important within the Plan area. The Provincial government is recognized as having responsibility over transportation planning and development within the Plan area.

4.5.1 Objectives

- (1) To ensure the establishment of a safe and efficient transportation network and to take into account traffic matters and the functional integrity of the transportation system in land use decisions.

- (2) To ensure that development is not approved without the necessary infrastructure improvements to accommodate the traffic generated by that development.
- (3) To support the development by the Ministry of Transportation of a safe, efficient and economic transportation system servicing both local and Provincial needs.

4.5.2 Policies

- (1) The Ministry of Transportation shall be encouraged to consult with the Regional District and the community in the planning of new roads or upgrades within the Plan area in an effort to effectively manage impacts to existing and future land uses.
- (2) The Ministry of Transportation shall, wherever possible, be encouraged to direct future roads away from existing and potential agricultural lands, environmentally sensitive areas, and important viewscales.
- (3) Off-street parking regulations in the zoning bylaw shall ensure a free-flow of traffic on public roads.

4.6 Environmental Hazards and Protection

There are a number of natural hazards (including flooding, landslides, and wildfire) that have the potential to cause damage, or loss, of life or property. In some instances areas within the jurisdiction of this Plan may not be conducive to development or may require special considerations in their development.

4.6.1 Objectives

- (1) To manage development in a manner that reduces risk to life and damage to property in natural hazard areas.
- (2) To encourage Provincial agencies, property owners, and developers to implement development strategies that reduces the risk of flood and other hazards.
- (3) To ensure that human activities do not contribute to flooding, increased water run-off, soil erosion, environmental pollution, or slope instability.

4.6.2 Policies

- (1) The Regional District will continue to manage building construction in floodplains by way of a floodplain management bylaw with measures such as minimum elevations and setbacks for new construction.
- (2) To protect against loss of life and property damage associated with flooding the Regional District will encourage non-polluting agricultural, park, and recreational uses in designated floodplain areas or on flood susceptible lands.
- (3) The Regional District encourages the Ministry of Forests and other Provincial agencies having jurisdiction to implement land use patterns that reduce the risk of wildfire and floods within the Plan area.
- (4) When rezoning to allow subdivision and/or development in areas that are known to have potential hazards, it is important that the proper scientific assessments are undertaken to ensure the area is appropriate for development and to mitigate potential damage to persons or property.
- (5) Rezoning to allow subdivision and/or development in a hazardous area or down slope from a hazardous area, will not be supported if it can not be demonstrated by a qualified person that measures will be taken to remediate the hazard, make the development capable of withstanding the effects of the hazard in a manner that requires minimal maintenance, and to protect adjacent properties from possible impacts.
- (6) Where a geotechnical or other engineering report has identified a hazard, a report and a covenant are to be registered on title restricting the use of the property in a manner contrary to the report and indicating that the land may only be used as recommended in the report.

4.7 Fire Smart Development

Residential and other development in proximity to forested areas are at risk from wild fires. Wildfires are recognized and accepted as a significant hazard in the plan area given the importance of the community to maintain a close connection to the natural environment. This threat has increased due to the dead timber associated with the Pine beetle infestation and historic fire suppression practices. The OCP supports efforts to reduce the risk associated with wildfire.

4.7.1 Objectives

- (1) To manage new development in a manner that reduces risk to life and damage to property due to wildfire.

- (2) To encourage Provincial agencies, property owners, and developers to implement development strategies that reduces the risk of wildfire.
- (3) To reduce the wildfire hazard for existing development.

4.7.2 Policies

- (1) Property owners and developers are encouraged to implement development strategies that reduce the risk of wildfire. For example property owners are encouraged to:
 - a) use non-combustible roofing and siding materials,
 - b) keep roofs clean from combustible debris,
 - c) keep combustible materials such as firewood and sheds at least 10 metres away from a principle building, and
 - d) set back buildings away from the top of sloped lands.
- (2) Applicants for rezoning to allow subdivision shall be required to consider “fire proofing” and “fire smart” principles in their subdivision design. For example new development should be designed to provide adequate emergency vehicle access and alternate escape routes.
- (3) Provincial agencies are encouraged to implement strategies to assess and reduce the risk of wildfire on their lands.
- (4) The Regional District encourages the Provincial Approving Officer to implement “fire proofing” and “fire smart” standards for subdivisions.

4.8 Economic Development

It is recognized that in order to achieve the goals contained in the Plan the region must provide opportunities for the creation of a vibrant, diverse, and sustainable economy. To do so requires maintenance and enhancement of the region’s quality of life, as well as its natural, cultural, and built amenities, thus ensuring compatibility between future economic activity and the rural character of the Plan area. As noted in the Plan, industrial and commercial activity is supported in select areas and within the District of Vanderhoof. However, the Plan recognizes the importance of a healthy home based business sector to the regional economy.

The Plan supports the maintenance of existing, and the increased establishment of new, home based businesses that are compatible with the rural residential and agricultural character of the area, and do not negatively impact the quality of life of area residents.

4.8.1 Objectives

- (1) To concentrate commercial and light industrial development in existing centres of activity, and to direct most of that activity within the District of Vanderhoof.
- (2) To increase the attractiveness of the Plan area to new residents, entrepreneurs, and business by protecting and enhancing the aspects of the social, cultural, natural, and built environment that contribute to the quality of life of residents.
- (3) To support home based business activity that fits within the rural character of the area and does not negatively impact resident quality of life.

4.8.2 Policies

- (1) Home based business activity that is compatible with the rural residential character of the Plan area shall be supported.
- (2) The Regional District especially encourages consulting, technology and information based home based business to locate in the Plan area.
- (3) The Regional District encourages service providers to improve cell phone service and high speed internet service in the areas where this service is limited or non existent.
- (4) The opportunity to establish home based business with a personal service, retail, or industrial character shall be limited in order to protect rural residential areas from impacts associated with noise and traffic, and to help protect the integrity of existing commercial and industrial areas.

4.9 Greenhouse Gas Emissions

The Regional District of Bulkley-Nechako recognizes that increasing emissions of human caused greenhouse gases (GHG) such as carbon dioxide and methane are affecting the Earth's climate, and the effects of climate change are evident across British Columbia.

In 2009 the Regional District of Bulkley signed the Climate Action Charter (CAC), which is an agreement between signatory local governments and the Province which outlines the commitments and responsibilities of the Province and local governments as they work together towards reduced greenhouse gas emissions.

Through the CAC the Regional District of Bulkley-Nechako has agreed to develop strategies and take actions to achieve the following goals.

- Being carbon neutral in respect of operations by 2012, recognizing that solid waste facilities regulated under *the Environmental Management Act* are not included in operations for the purposes of the CAC.
- Measuring and reporting on our community's GHG emissions profile.
- And, creating complete, compact, more energy efficient rural and urban communities.

In 2007 the Province established the following goals.

- By 2020, B.C. will reduce its greenhouse gas emissions by 33 per cent, compared to 2007 levels.
- By 2050, GHG emissions in the Province will be reduced by at least 80 per cent below 2007 levels.
- By 2010, the B.C. public sector will be carbon neutral.

Section 877(3) of the *Local Government Act* states that Official Community Plans adopted after May 31, 2010 must include targets for the reduction of greenhouse gas (GHG) emissions in the area covered by the plan, and policies and actions of the local government proposed with respect to achieving those targets.

The Province of British Columbia completed the Community Energy and Emissions Inventory (CEEI) in 2007 (attached). The data provided by the CEEI initiative does not provide the information necessary for the establishment of a baseline, or future measure, of the community wide GHG emissions generated in each Electoral Area. Therefore, the data is not appropriate for the establishment of bottom up or pragmatic targets. Area specific, accurate, and measurable data regarding emission sources and quantity, especially with regards to transportation, are necessary to identify GHG reduction targets that have any meaning with respect to measurement and achievability. However, the CEEI data can potentially be used to quantify current and future patterns of energy used by building type and on road transportation, provided that future CEEI data is comparable in future years. This would serve as an indicator of the intensity of energy used and GHG emitted in the region.

The Regional District of Bulkley-Nechako does not have the financial capacity to undertake community energy emissions inventories that are an improvement over the provincial CEEI initiative. Therefore, the remaining option to satisfy the Province with regards to Section 877 (3) of the *Local Government Act*, and to ensure the Regional District of Bulkley-Nechako remains eligible for Provincial grant funding, is to establish visionary or top down targets which are not based upon any analysis regarding achievability, and are not intended to be tracked or achieved locally. However, these targets reflect a commitment to action, and they are backed up by concrete community goals and objectives regarding the reduction of GHG emissions.

4.9.1 OCP Visionary Targets and Action

For the purpose of complying with Section 877 (3) of the *Local Government Act* and meeting the commitments under the CAC the Regional District of Bulkley-Nechako accepts the following provincial GHG reduction targets as the Regional District's visionary target.

- By 2020, B.C. will reduce its greenhouse gas emissions by 33 per cent, compared to 2007 levels.
- By 2050, GHG emissions in the Province will be reduced by at least 80 per cent below 2007 levels.

The Plan seeks to reduce GHG emissions in a manner that promotes and secures the regions long term economic prosperity, protects the environment, and ensures that the negative effects of climate change are minimized for the benefit of the residents of the region, and British Columbia.

In the rural areas of the Regional District the primary manner in which the Regional District can influence community wide GHG emissions is through the establishment of objectives and policy for development and land use patterns that are more energy efficient, result in more self sustaining communities, and limit unnecessary rural residential sprawl. This involves policy relating to increased public awareness of issues and options regarding energy use. These objectives and policies are identified in Sections 4.9.2 and 4.9.3 below.

The Regional District of Bulkley-Nechako is committed to doing its part to achieve reductions in GHG emissions; however, it is recognized that success in reducing community wide GHG emissions is largely dependent upon technology change and the actions of senior levels of government, and their agencies and corporations. The majority of the GHG emissions that are generated in the rural areas of the Regional District are subject to limited influence by the Board of the Regional District of Bulkley-Nechako.

4.9.2 Objectives

- (1) The Regional District of Bulkley-Nechako will work towards reducing Electoral Area F community greenhouse gas emissions by encouraging, facilitating, and supporting development and land use patterns that are more energy efficient, result in more self sustaining communities, and limit future unnecessary rural residential sprawl.
- (2) The Regional District will promote energy efficiency, energy security and reduced energy costs.

- (3) The Regional District will work cooperatively with senior levels of government on their initiatives to reduce GHG emissions where meaningful consultation is initiated.

4.9.3 Policies

- (1) Incentives offered by utilities and senior government to reduce residential energy use will be promoted.
- (2) The use of building permit rebates where certain sustainable development practices are used shall be considered.
- (3) Residents and local businesses shall be encouraged to investigate and adopt new technologies and best practices to reduce greenhouse gas emissions.
- (4) The use of sustainability checklists shall be considered for use as part of building permit, rezoning, development variance permit, and temporary use permit applications in order to raise awareness of options to reduce greenhouse gas emissions and reduce the impact of development on the environment.
- (5) Renewable energy generation such as biomass, geothermal heating, solar power, and wind turbines are encouraged.
- (6) The objectives identified in Section 4.9.2 of this bylaw are achieved through the implementation of the following land use and development policies:
 - a) Within the Agricultural Designation, the Policies in Section 3.1 support the local production of food, and other agricultural products.
 - b) Within the Commercial Designation, Objective 3.2.1(1) supports the establishment of neighbourhood commercial services.
 - c) Within the Commercial Designation, Policy 3.2.2(1) encourages significant commercial uses to establish within the District of Vanderhoof.
 - d) Within the Commercial Designation, Policy 3.2.2(2) supports commercial areas for neighbourhood services subject to certain criteria.
 - e) Home based businesses are supported throughout the plan with Policy 3.2.2(5), Policy 3.4.2(2), Policy 3.5.2(2) and Policy 4.8.2(1).

- f) Within the Industrial Designation, Policy 3.3.2(1) encourages new light industrial uses to establish within the boundaries of the District of Vanderhoof.
- g) Within the Rural Resource Designation, Policy 3.8.2(1) allows only a limited amount of low density residential use.
- h) Within the Rural Resource Designation, Policy 3.8.2(5) supports the development of wind farms intended to generate power for sale
- i) Policies 3.4.2(6), 3.4.2(10), 3.5.2(6), and 4.2.2(1)(a) promote the use of alternative development practices such as lot averaging and bare land strata development.
- j) Policy 4.4.2(1) directs urban scale development requiring community water and sewer services into municipalities where such services can be provided as an extension to existing systems.

SECTION 5 – ASSOCIATED MAPS

5.1 Interpretation of Land Use Designation Map

The Land Use Designation Map attached hereto as Schedule “B” indicates the general location and distribution of major land use designations in the Plan area. The boundaries of the designations are approximate and convey the relationship between principal uses. These boundaries will be defined in detail in the implementing bylaws.

5.2 Land Use Designation Explanations

Unless otherwise restricted in this Plan, lands with the following land use designations may be considered for rezoning to allow the following types of uses:

Agriculture (AG): In areas so designated, zoning may consider permitting the following uses: agriculture, single family dwellings, logging and silviculture, guest cabins, outdoor recreation and primitive campsites, kennels and veterinary clinics, accessory buildings and structures and home-based business. Bed and breakfasts may also be permitted as appropriate.

Commercial (C): In areas so designated, zoning may consider permitting the following uses: neighbourhood services, tourist commercial enterprises, bed and breakfasts and home based businesses.

Industrial (I): In areas so designated, permitted uses shall vary according to the policies of this Plan and the *Agricultural Land Commission Act*.

Rural Residential (RR): In areas so designated, zoning may consider permitting the following uses: residential dwellings, agricultural and recreational uses, accessory buildings and structures and home-based businesses. Bed and breakfasts may also be permitted as appropriate.

Lakeshore (L): In areas so designated, zoning may consider permitting the following uses: residential dwellings, agricultural and recreational uses, accessory buildings and structures and home-based businesses. Bed and breakfasts may also be permitted as appropriate.

Civic Institutional (C/I): In areas so designated, zoning may consider permitting the following uses: public buildings and facilities including schools, fire halls, community gathering facilities, churches and recreational facilities.

Parks and Recreation (P): Parks and recreation uses may be considered throughout the plan area in any designation. The Parks and Recreation (P) designation applies to Provincial parks and known park areas at the time of adoption of this plan.

Resource (RE): In areas so designated, zoning may consider permitting the following uses: agriculture and grazing; mineral or aggregate extraction; wilderness oriented recreation; limited residential use and necessary institutional, public, utility or transportation services. Tourist commercial land uses may also be considered where appropriate.

5.3 Interpretation of the Ecological and Wildlife Values Map

The Ecological and Wildlife Values Map attached hereto as Schedule “C” indicates the general location and distribution of major ecological and wildlife habitat features in the Plan area. The intention of this map is to identify areas where specific ecological and wildlife habitat values will be considered during development review processes.

5.4 Ecological and Wildlife Values Explanations

The features represented in the Ecological and Wildlife Values Map were identified through the Vanderhoof LRMP process. The following explanations are summarized from this document:

Multi-Value Emphasis Zone: Management in these areas is generally through Subzones, which integrate a wide array of resource values and permissible uses. Resource development will be integrated with requirements of other resource values. Investments in resource development and enhancement are encouraged and will be integrated with other management objectives.

Protected Zone: These areas are protected for their natural or cultural heritage and/or recreational values as defined by the Protected Areas Strategy in the Vanderhoof LRMP. Logging, mining and energy exploration and development are prohibited.

Resource Development Emphasis Zone: Management in these areas is for development of resources such as timber and mineral while minimizing impact and/or enhancing other resource values (ex. moose habitat). Resource development is subject to all applicable provincial regulations (e.g. the Forest Practices Code). Investments in resource development and enhancement are encouraged.

Settlement/Agriculture Zone: An area consistent with the patterns of agricultural development and settlement in the Nechako Valley. The zone closely follows the boundaries of the Vanderhoof Crown Land Plan developed in 1984 by B.C. Lands with public and resource agency consultation. Resource development is permitted and encouraged so long as Vanderhoof LRMP zone objectives are achieved.

Special Resource Zone: In these areas, conservation of one or more non-consumptive resource values such as habitat, recreation, scenery and community watersheds is a priority. Resource development activities are encouraged. Management follows provincial regulations and guidelines, and may also be subject to more comprehensive resource conservation strategies identified in the Vanderhoof LRMP.

SECTION 6 – IMPLEMENTATION

Following the formal adoption of this Plan a number of options are available to ensure that the Board's goals and objectives are achieved. Implementation shall be the ongoing responsibility of the Regional District of Bulkley-Nechako Board of Directors and its actions must be consistent with the Plan. The document also serves as a guide and resource for Regional District of Bulkley-Nechako staff and other levels of government in their planning and decision making processes. This Section identifies some of these mechanisms for implementation and considers their application in the Plan area.

6.1 Zoning, Development and Subdivision Control

- (1) Development proposals that require rezoning or other discretionary approval by the Regional District shall be evaluated in accordance with the intent and direction provided by the policies in this Plan.
- (2) The final approval of subdivisions remains with the Provincial Approving Officer who shall have regard for the policies of this Plan in considering applications.
- (3) Generally, the Regional District shall, as the need and opportunity arise, provide input to and liaise with other agencies to ensure that development proposals reflect the land use designations, policies and objectives of this plan.

6.2 Temporary Use Permits

- (1) Temporary commercial or industrial permits may be issued, pursuant to Section 921 of the *Local Government Act*, throughout the plan area, where:
 - (a) The proposed temporary use will not create an amount of traffic that will adversely affect the natural environment, or rural character of the area;
 - (b) The environment would not be negatively affected by the proposed temporary use;
 - (c) The proposed temporary use will not have adverse affects on neighbouring land uses or property owners;
 - (d) The proposed temporary use does not require a significant amount of capital investment in a particular location; and,
 - (e) The proposed temporary use has the support of the Agricultural Land Commission if the land is within the Agricultural Land Reserve (ALR).

6.3 Development Proposals Contrary to the Plan

- (1) Development proposals that require rezoning or other discretionary approval by the Regional District and are contrary to the objectives, policies or land use designations of this Plan shall not be approved.
- (2) Proposals to amend the Plan must be approved by the Regional District Board of Directors pursuant to the requirements of the *Local Government Act*, and, subject to any required Provincial approvals.

6.4 Agricultural Land Commission

- (1) The Regional Board recognizes the Agricultural Land Commission's mandate for the preservation and enhancement of agricultural land. It is also recognized that all lands within the Agricultural Land Reserve (ALR) are subject to the *Agricultural Land Commission Act*, its orders and regulations.
- (2) Proposals for non-farm use, subdivision, exclusion or inclusion of lands within the Agricultural Land Reserve (ALR) require approval from the Agricultural Land Commission. In commenting to the Agricultural Land Commission the Regional District will have regard for the provisions of this Plan, the potential impact on the agricultural viability of the subject property and surrounding area, and the suitability of the land for agriculture.
- (3) Proposals for non-farm use, subdivision, exclusion or inclusion of lands within the ALR that are approved by the Agricultural Land Commission remain subject to the policies and regulations of the Regional District.

6.5 Building Inspection

- (1) Building inspection is a requirement in parts of the Plan area. Building permits cannot be issued for developments that are contrary to the implementing Zoning Bylaw.
- (2) The consideration of expansion of Building Inspection services shall occur for areas where notable development is occurring.

6.6 Water and Sewer Approvals

- (1) The Provincial government regulates water and sewer systems through such legislation as the *Drinking Water Protection Act*, the *Health Act* and the *Waste Management Act* and regulations thereto.

- (2) The Regional District supports these enactments and expects that all water and sewer systems within the Plan area will comply with applicable regulations.

6.7 Collaborative Planning

- (1) In order to facilitate orderly urban growth the Regional District will work with the District of Vanderhoof as necessary to develop land use strategies for lands identified for future incorporation into the municipalities.
- (2) Where the Regional District is addressing a land use issue that is adjacent to, or potentially impacting, the District of Vanderhoof, the Regional District shall consult with the municipality as appropriate.
- (3) Where the Regional District is addressing a land use issue that is within, adjacent to, or potentially impacting, an established neighbourhood, the Regional District shall consult with those established neighbourhood groups, as appropriate.
- (4) Where the District of Vanderhoof is addressing a land use issue that is adjacent to, or potentially impacting, the Regional District, the municipality is encouraged to consult with the Regional District, as appropriate.
- (5) Where the Regional District is addressing a land use issue that is adjacent to, or potentially impacting, First Nations communities, the Regional District shall consult with those First Nations, as appropriate.
- (6) Where a First Nation is addressing a land use issue that is adjacent to, or potentially impacting, the Regional District, the First Nation is encouraged to consult with the Regional District, as appropriate.
- (7) The Regional District encourages opportunities to undertake collaborative planning and consultation processes with other local governments, First Nations, Provincial Ministries, and other agencies and groups to better achieve the goals of this Plan.
