2018 Wildfires Long Term Recovery

Many of you may already be aware of the formation of an "Unmet Needs Committee", comprised of local residents: It is chaired by our Recovery Manager, and will maintain a presence at the Regional District office until September 30, 2019. This committee is responsible for the identification long term needs of individuals and the community to return, as much as possible, to pre-fire levels.

"Unmet needs" refers to those needs that have not been met, through a variety of service organizations Red Cross, Federal, Provincial, Local Authority or First Nations programs.

Typical long term unmet needs can include the following: water, power, access, debris removal, or danger tree removal.

To aid in the identification of unmet needs, please answer the following questions:
