As mentioned, a key part of the 2019 CARIP Survey is to highlight and celebrate successful climate actions undertaken by local governments in British Columbia. This question provides local governments the opportunity to demonstrate leadership and innovative approaches to reduce corporate GHG emissions.

When it comes to the corporate climate action, please highlight up to three significant actions focused on reducing GHG emissions that your local government undertook in 2019:

#### Corporate Action #1

All the fluorescent lights in the Administration Building were replaced in 2019 with more energy efficient LED ones. This project was completed in the fall. We look forward to seeing how this affects our hydro consumption in the coming years.

#### Corporate Action #2

The Bulkley Valley Pool continues to look for innovative ways to reduce their GHG footprint and bring down their operating costs. In 2019, they installed a new dehumidifier that allows for more air to be re-circulated for longer periods, lowering the runtime between on and off cycles, thus reducing gas consumption.

### Corporate Action #3

The BV Pool also replaced their Court/Climbing Wall roof top unit. This modern technology is more efficient, consuming less gas, as well improved DDC control, which allows it to maximize run times.

As mentioned, a key part of the 2019 CARIP survey is to highlight and celebrate successful climate actions undertaken by local governments in British Columbia. This question provides local governments the opportunity to demonstrate leadership and innovative approaches to reduce community-wide GHG emissions.

When it comes to the community-wide climate action, please highlight up to three significant actions focused on reducing GHG emissions that your local government undertook in 2019:

#### Community-Wide Action #1

We were able to improve the recycling depots in both Burns Lake and Fort St. James during 2019. This included the addition of more stewardship programs, such as electronics and small appliances. This will allow residents to recycle these materials instead of having them go to the landfill.

#### Community-Wide Action #2

In terms of planning actions, the Official Community Plan for Electoral Area 'D' was completed. And Area 'F's Plan is now in the process of being reviewed. Also, the zoning bylaw was updated. This included amending flood control measures.

#### Community-Wide Action #3

In the community of Fort Fraser, a Water Conservation Plan was completed. Along with the completion of the water system upgrade, this will enable this community to have safe drinking water and use that resource wisely.

### 2019 CLIMATE PREPAREDNESS AND ADAPTATION ACTION:

As mentioned, a key part of the 2019 CARIP survey is to highlight and celebrate successful climate actions undertaken by local governments in British Columbia. This question provides local governments the opportunity to demonstrate leadership and innovative approaches to adapting to a changing climate.

When it comes to climate preparedness and adaptation actions, please highlight up to three significant actions/initiatives that your local government undertook in 2019:

#### Adaptation Action #1

In February, the Ebenezer Flats/Kidd Road Flood Mitigation Study was completed. Ebenezer Flats is located within Bulkley River floodplain and has been the subject of historical flooding. The purpose of this flood mitigation study was to understand the flood risks at Ebenezer Flats and to develop flood mitigation measures.

#### Adaptation Action #2

In response to growing wildfire risks, the Protective Services Department has sought funding to support their department. This will enable them, not only to respond to incidents like fire and floods when they happen, but also to educate the public so that the communities are prepared for disasters when they happen.

#### Adaptation Action #3

In 2019, the Agricultural Coordinator worked together with the Regional District of Fraser-Fort George and the University of Northern BC to complete the Regional Adaptation Strategy. This looked at the climate trends in our area and how this impacts agriculture. This will be a valuable tool moving forward.

### Section 3: 2019 Carbon Neutral Reporting

Local governments are required to report on their progress in achieving their corporate carbon neutral goal under the B.C. Climate Action Charter. Working with B.C. local governments, the joint Provincial-UBCM Green Communities Committee has established a common approach to determining corporate carbon neutrality for the purposes of the Charter, including a Carbon Neutral Framework and supporting guidance for local governments on how to become carbon neutral.

Prior to completing this portion of the survey, please ensure that you are familiar with guidance available on the B.C. Climate Action Toolkit website, specifically the Workbook (WILL BE UPDATED) and Becoming Carbon Neutral: A Guide for Local Governments in British Columbia (WILL BE UPDATED).

Please note: As a result of the BC Recycling Regulation, local governments are no longer required to account for GHG emissions from vehicles, equipment and machinery required for the collection, transportation and diversion of packaging and printed paper, in their annual CARIP reports.

#### 2019 CARBON EMISSIONS

Did your local government measure corporate GHG emissions for 2019?

- ☒ Yes

**GREEN COMMUNITIES COMMITTEE CLIMATE ACTION RECOGNITION PROGRAM:**

The joint Provincial-UBCM Green Communities Committee is pleased to be continuing the Climate Action Recognition Program again this year. This multi-level program provides the Green Communities Committee with an opportunity to review and publicly recognize the progress and achievements of each Climate Action Charter (Charter) signatory.

Recognition is provided on an annual basis to local governments who demonstrate progress on their Charter commitments, according to the following:

**Level 1 – Demonstrating Progress on Charter Commitments:** For local governments who demonstrate progress on fulfilling one or more of their Charter commitments.

**Level 2 – Measuring GHG Emissions:** For local governments that achieve Level 1, who measure their corporate GHG emissions for the reporting year and demonstrate that they are familiar with their community's energy and emissions inventory (i.e. CEEI).

**Level 3 – Accelerating Progress on Charter Commitments:** For those local governments who have achieved Level 1 and 2 and demonstrate significant action (corporately or community-wide) in reducing GHG emissions in the reporting year (e.g. through undertaking a GHG reduction project, purchasing offsets, establishing a reserve fund).

**Level 4 - Achievement of Carbon Neutrality:** For local governments who achieve corporate carbon neutrality in the reporting year.

Based on your local government's 2019 CARIP Climate Action/Carbon Neutral Progress Survey, please check the Green Communities Committee Climate Action Recognition Program level that best applies:
